Re: Increasing bed reporting in EMResource

The Department appreciates all the Illinois hospitals documenting their bed availability and other query data daily and during the COVID-19 pandemic. As the pandemic progresses, IDPH is requesting that all hospitals increase their reporting of daily bed availability and COVID/PUI ICU and Vent Patient data to **TWICE DAILY** starting **April 1, 2020 at 10am**. These times will be at 10am and 6pm daily. The PPE (all regions) and lab data (regions 1-10), will remain at once daily at 10am.

Your attention to the accuracy and timeliness of this reporting is appreciated as this pandemic evolves in Illinois. If further increased reporting is necessary IDPH will communicate those requests when necessary.

Please reach out to your regional staff if there are questions!
